Election/Restriction

Page 2

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15 and 37-42, drawn to a liquid distillation system, classified in class

202, subclass 176.

II. Claim 16, drawn to a method for distilling a liquid, classified in class 203,

subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another

materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as

claimed can be used to practice another and materially different process such as: a process

utilizing an activated carbon filter, a pasteurization, and a reverse osmosis process, as

recognized by applicants, noting e.g., page 1, lines 20-21 of the specification.

Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification; and because of their

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR
